TREND SETTERS IN PLASTICS PIPING

## Supreme **GRATINGS** For Surface Drainage

Supreme Industries Ltd., founded in 1942, is the leading and largest plastics processor in the country. Due to its innovative range of products, coupled with meticulous quality assurance, Supreme is referred to as " **People who know plastics the best** ".

The company believes in supplying only superior quality products aimed at satisfying domestic and international customers. Supreme's view about high quality and advanced range of products, is supported by its state-of-the-art equipment installed at its plants, and its modern technical know-how available from the world leaders in plastics piping - **Wavin Overseas B.V. of the Netherlands**.

### Innovations 'the key' to product performance

Our objective is to meet the growing needs of customers in Plumbing and Drainage through a specially selected, high-tech piping range, product development and continuous upgradation of quality. We are pioneers in introducing the most cost effective and efficient building piping products and providing complete piping solution for the building industry.

Supreme is now pleased to add another new product to its list of new offerings, i.e. gratings for surface drains. The gratings that are used at present are in concrete or cast iron and they pose several problems such as heavy weight and hence difficulty in handling and installation, being largely prone to corrosion and, last but not the least, being expensive. The gratings in plastic, offered by Supreme, are free from the aforesaid problems and in fact, have several advantages that make the product an ideal choice for surface drain covers.

### Range

Gratings are available in standard lengths of 500 mm and 600 mm and in widths of 150mm, 200mm, 375mm and 400 mm. They are provided with slots.

### Fields of applications

The Supreme uPVC gratings offer an ideal solution for surface drains, in various applications .i.e. pavements, road side curbs, cycle paths, car-parks, school yards, play grounds, shopping malls, storage yards, sports grounds, building terraces and balconies, and several others.

### Advantages

- **Light weight - Easy to handle and store**
- **Easy to install**
- **Versatility**
- **Tough and durable**
- **Excellent corrosion and chemical resistance**
- **Environment friendly**
- **Less prone to thefts**
- **Cost Effective**
- **Effective substitute to C.I. and concrete gratings**
